

Business Type: Manufacturing - Water Control Technology
Staffing Need: Specialized Technical Assembly

The Rodney Hunt Company has been involved in the water power and control industry since 1840. Today, their leadership in the design and manufacture of cast and fabricated gates, valves, and actuating equipment helps communities control the movement, distribution, and reclamation of water for industry, agriculture, and domestic use across the USA and in 48 countries around the world. They are specialists in water control. Their products make it faster for municipalities, engineering firms, and contractors to bring their water management projects in on-time, on-budget, and trouble-free.

Challenges:

- ✓ Rodney Hunt was faced with the unique problem of having overbooked capacity in their hydraulics assembly area
- ✓ The company was in danger of missing shipment deadlines and possibly losing valued customer relationships
- ✓ Skills needed in the hydraulics assembly area are highly specialized
- ✓ No one else on the Rodney Hunt staff possessed the needed skills

Solution:

- ✓ Rodney Hunt turned to the outside for help, contacting several employment agencies and recruiters for help, including Masiello Employment Services
- ✓ Having dealt with Masiello Employment in the past, Rodney Hunt was certain they could help with the current circumstances
- ✓ Masiello Employment's experienced and knowledgeable staff kicked into action to locate individuals meeting the current need

Results:

- ✓ After only a short period of time, Masiello Employment's Staffing Consultants presented Rodney Hunt with five highly qualified candidates
- ✓ Of the five candidates presented, Rodney Hunt hired three
- ✓ No other agency was able to supply a single suitable candidate
- ✓ Rodney Hunt continues to count on Masiello Employment's fast and accurate services to alleviate bottlenecks in production
